Desktop:

The image shows a web application titled "Password Generator" on a light blue background. Inside a white-bordered box, there is a "Generated Password" field with a dashed border and a copy icon. Below it, the text "Password Strength:" is followed by "Length: 12" and a diamond icon. There are four checkboxes: "Include Uppercase", "Include Lowercase", "Include Number", and "Include Special Characters". At the bottom is a dark grey button labeled "Generate Password".

Testing scenarios:

- The user clicks the "Generate Password" button without customizing any parameters. Decides to quit the password generator.

The image shows a web application titled "Password Generator" on a light blue background. Inside a white-bordered box, there is a text input field labeled "Generated Password" containing a blurred password. Below the field, the text "Password Strength:" is followed by "Length: 12" and a double-headed arrow icon. There are four unchecked checkboxes: "Include Uppercase", "Include Lowercase", "Include Number", and "Include Special Characters". At the bottom of the box is a dark grey button labeled "Generate Password".

- The user clicks on the "Generate Password" button and then clicks on the "Copy to Clipboard" button. Decides to quit the password generator.
